

Press Release

17 March, 2020

UK aerospace start-up Faradair® signs the Terra Carta

Faradair is proud to announce its support for the #TerraCarta, a Charter backed by HRH The Prince of Wales that puts sustainability at the heart of the private sector.

Following on from our recent announcement pledging to build and deploy 300 hybrid-electric aircraft across the world by 2030, we continue our commitment to protect the environment by signing this Terra Carta.

The Terra Carta, announced by HRH in January 2021 at the One Planet Summit in Davos, is part of the Sustainable Markets Initiative. It provides a roadmap to 2030 for businesses to move towards an ambitious and sustainable future; one that will harness the power of Nature combined with the transformative power, innovation and resources of the private sector.

The global business proposition outlines ten areas for action and comprises of nearly 100 actions for business as the basis of a recovery plan that puts Nature, People and Planet at the heart of global value creation.

We wholeheartedly share these values and are honoured to support the Sustainable Markets Initiative and HRH The Prince of Wales in this important drive toward a better future.
